

Burnley Borough Council

Housing Land Supply Assessment: October 2025

1. Introduction

This Assessment sets out the updated 5-year housing land supply position for Burnley Borough. It updates the Assessment of October 2024.

2. Burnley's Housing Requirement

A housing requirement is set in Burnley's Local Plan (Adopted 2018). The Plan is underpinned by evidence of Objectively Assessed Housing Need (OAN) set out in the 2016 Burnley Strategic Housing Market Assessment Update and its Addendum of October 2017. Policy SP2 of the Local Plan establishes a requirement for a minimum of 3,880 net additional dwellings over the plan period 2012-2032, equivalent to an indicative average of 194 net additional dwellings per annum.

In July 2023, following a statutory review, the Council resolved that the Local Plan did not require updating. The Plan's housing requirement will therefore continue to be used in undertaking the borough's 5-year housing land supply assessment.

3. Housing Completions

Between 1 April 2024 and 31 March 2025 there were **264** net¹ dwelling completions². Of these, **257** were new build completions and **7** changes of use/conversion³. A list of completions is shown at Appendix A.

The number of completions in 2024/5 showed a small increase on last year's figure.

The average number of completions per annum over the thirteen-year period since the start of the new Local Plan period is **228**.

3.1 Allocated Sites

192 housing completions were on sites allocated for housing in Burnley's Local Plan. This represents 73% of this year's completions. The current status of the allocated housing sites is shown in Appendix C.

¹ Net completions are 'gross' new builds plus the 'net' gains of residential units from conversions and changes of use

² Dwellings are considered to be complete when the roof is on and the windows are in. This definition was adopted by all Lancashire Districts for the purposes of previous joint housing land studies.

³ Conversions are where existing dwellings are being split or merged e.g. one house into two flats. Changes of use are where a change of Use Class is involved e.g. barn to house

3.2 Windfall Sites

Windfall housing sites are those that have come forward on sites that are not allocated in a local plan. **72** (27%) of this year's housing completions were on windfall sites.

4. Sites under Construction

As at 31 March 2025, development was underway on a total of 17 sites with a potential yield of **478** further dwellings. A list of these sites is provided at Appendix D. Of these, **452** are anticipated to come forward in the 5-year period of this assessment.

5. Demolitions

In the early years of the Local Plan period there were a large number of residential demolitions resulting from the latter stages of the Borough's Housing Market Renewal Programme. This programme has now been completed. The number of demolitions since the start of the Local Plan period in 2012 is set out in the table below:

Residential Demolitions 2012 – 2025	
Year	Demolitions
2012/2013	55
2013/2014	26
2014/2015	92
2015/2016	1
2016/2017	25
2017/2018	0
2018/2019	0
2019/2020	2
2020/2021	1
2021/2022	1
2022/2023	2
2023/2024	1
2024/2025	2
Total Demolitions	208

2024/25 Demolition of 2 properties as part of the following applications:

FUL/2024/0104 78 Stirling Court, Briercliffe; and
FUL/2023/0636 243 Burnley Road, Cliviger

6. Net Additional Dwellings

To calculate the number of net additional dwellings per year, it is necessary to subtract the number of dwelling demolitions in that year from the number of net dwelling completions. The average number of net additional dwellings per annum since the start of the new Local Plan period is **212**.

Net Additional Dwellings 2012 - 2025			
Year	Net Completions	Demolitions	Net Additional Dwellings
2012/13	80	55	25
2013/14	188	26	162
2014/15	120	92	28
2015/16	258	1	257
2016/17	226	25	201
2017/18	335	0	335
2018/19	251	0	251
2019/20	167	2	165
2020/21	235	1	234
2021/22	330	1	329
2022/23	258	2	256
2023/24	249	1	248
2024/25	264	2	262
Totals	2961	208	2753

7. Planning Permissions

During 2024/2025, planning permissions and prior approvals were granted for a total of **232** new dwellings. A list of the permissions is included at Appendix B. These figures do not include schemes awaiting the signing of a Section 106 Agreement.

New Planning Permissions Granted 2012 to 2025	
Year	Permissions
2012/13	196
2013/14	198
2014/15	129
2015/16	147
2016/17	562
2017/18	126
2018/19	399
2019/20	125
2020/21	422
2021/22	86
2022/23	517
2023/24	298
2024/25	232
Total	3437

8. Extant Planning Permissions

As at 31st March 2025, **449** dwellings had planning permission on sites that were not yet under construction. Of these, **340** are for new build dwellings and **109** Changes of Use/Conversions. A list of these sites is provided at Appendix D.

9. Housing Delivery Test

The Housing Delivery Test is a measurement of the number of homes delivered against the number required according to a specified source (which in Burnley's case for this particular test is not the adopted Local Plan), over a rolling three-year period. Further information on the Housing Delivery Test is provided in National Planning Policy Guidance (NPPG) on Housing Supply and Delivery.⁴ This states that the Secretary of State will publish the Housing Delivery Test results annually in November. (The 2023 results were published in December 2024.)

Burnley's score for 2023, was **603%** and as a result there is no consequence of the Housing Delivery Test for the Borough.

⁴ <https://www.gov.uk/guidance/housing-supply-and-delivery>

10. Five-Year Housing Land Supply Assessment

10.1 National Policy

Paragraph 78 of the National Planning Policy Framework 2024 states that “*Local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years’ worth of housing against their housing requirement set out in adopted strategic policies⁵, or against their local housing need where the strategic policies are more than five years old⁶. The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:*

- a) 5% to ensure choice and competition in the market for land; or*
- b) 20% where there has been significant under delivery⁷ of housing over the previous three years, to improve the prospect of achieving the planned supply; or*
- c) From 1 July 2026, for the purposes of decision-making only, 20% where a local planning authority has a housing requirement adopted in the last five years examined against a previous version of this Framework⁸, and whose annual average housing requirement⁹ is 80% or less of the most up to date local housing need figure calculated using the standard method set out in national planning practice guidance.”*

10.2 What are deliverable sites?

The NPPF Glossary states that “*To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:*

- a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission should be considered deliverable until permission expires, unless there is clear evidence that schemes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).*
- b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.”*

⁵ The delivery of large scale developments may need to extend beyond an individual plan period, and the associated infrastructure requirements may not be capable of being identified fully at the outset. Anticipated rates of delivery and infrastructure requirements should, therefore, be kept under review and reflected as policies are updated.

⁶ Unless these strategic policies have been reviewed and found not to require updating.

⁷ This will be measured against the Housing Delivery Test, where this indicates that delivery was below 85% of the housing requirement

⁸ Or the housing requirement is more than five years old and the relevant strategic policies have been reviewed and found not to require updating.

⁹ Defined as the total housing requirement, divided by the number of years in the plan period. For joint local plans, the percentage should be applied in aggregate across the joint local plan area.

10.3 Windfall Allowance

The NPPF Glossary defines windfall sites as sites “... not specifically identified in the development plan.”

Paragraph 75 of the NPPF states that: “Where an allowance is to be made for windfall sites as part of anticipated supply, there should be compelling evidence that they will provide a reliable source of supply. Any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends. Plans should consider the case for setting out policies to resist inappropriate development of residential gardens, for example where development would cause harm to the local area.”

Windfall sites have contributed significantly to the Borough’s housing supply. As shown in the table below, whilst the majority of houses built over the past 15 years have been on windfall sites and it is certain they will contribute to supply in the future, as predicted, they are forming a lesser proportion of the total number of houses delivered as the Local Plan allocations are built out.

Past Windfalls 2010 – 2025					
Year	Net Completions (new build and conversion/cou)	of which windfalls (new build and conversion/cou)	% Windfalls	of which brownfield (current definition)	of which less than 0.4 hectares
2010/11	82	69	84%	67	16
2011/12	131	131	100%	129	40
2012/13	80	80	100%	80	45
2013/14	188	179	95%	178	16
2014/15	120	120	100%	120	15
2015/16	258	258	100%	257	58
2016/17	226	226	100%	224	129
2017/18	335	315	94%	313	75
2018/19	251	177	71%	171	65
2019/20	167	76	46%	74	29
2020/21	235	120	51%	118	31
2021/22	330	145	44%	144	108
2022/23	258	88	34%	85	46
2023/24	249	135	54%	104	28
2024/25	264	72	27%	65	16
Total	3174	2191	69%	2129	717

Policy SP2 of the adopted Local Plan includes a windfall allowance based on small brownfield windfalls (in line with the expectations of the previous NPPF) using previous completion rates on brownfield sites below the Local Plan allocation size threshold of 0.4 hectares. The Local Plan based this on the trend over a 5-year period 2010-2015.

This approach was taken in the Proposed Submission Plan of 2017 to recognise that in 2016 the Council’s housing monitoring survey was delayed due to work on the Preferred Options. This meant that in respect of new builds, which are monitored via site visits, it was not possible for officers to determine whether the houses had been completed before 1 April 2016 or after. This was not the case with change of use/conversions as these are monitored through Council Tax records rather than site

visits. Subsequent monitoring has resolved this possible anomaly. These windfalls averaged at 26 per annum.

The adopted Plan continued to use this same rate, and for this Assessment this rate is also proposed. This was acknowledged to be a conservative estimate as has proven to be the case. If the last 5 years were to be used to give a new average (using the same criteria), this this would give a windfall figure of 46 per annum. Whilst some new large windfall sites will come forward over the next 5 years, the ongoing build-out of allocated sites is likely to dampen windfall demand/delivery.

In line with the approach of the adopted Local Plan therefore:

- No allowance has been made to take account of past or future garden windfall sites which the NPPF considers to be inappropriate development in some circumstances.
- No allowance has been made to take account other past or future other greenfield windfall sites although these e.g. large greenfield windfalls within the development boundary¹⁰, barn conversions, rural workers dwellings, rural exception sites, disused allotments etc, will still contribute to supply.
- No allowance has been made for future large brownfield windfall sites (over 0.4 hectares) as these would have normally been identified first in the SHLAA, and then where appropriate, allocated though the Local Plan. Some such sites have and will continue to come forward as windfalls within the plan period, including through the exercise of permitted development rights that were not a consideration in the Local Plan's windfall allowance.
- No allowance has been made for years 1 and 2 to avoid double counting (as the majority of completions during years 1 and 2 (2023/24 and 2024/25) are likely to be on deliverable sites which already have planning permission and have therefore already been counted).

The windfall allowance remains therefore a conservative estimate as demonstrated by the delivery figures in the table above.

10.4 Identified Sites

As stated earlier, in respect of allocated sites, sites with planning permission or sites identified on a brownfield register, the NPPF 2024 glossary states that:

- a) "sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).*
- b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it*

¹⁰ e.g Site at Ridge Avenue OUT/2023/0341 - Outline application for up to 40 dwellings (awaiting approval subject to a S106)

should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years”

All sites on the Council’s brownfield register are either allocated or have planning permission.

The deliverability of the sites identified for allocation was tested at the Local Plan Examination and the agreed assumptions have been revisited and updated for this Assessment as necessary against the new NPPF. (See Appendix E)

For sites with planning permission under 0.4 hectares, the Local Plan adopts at 10% non-implementation rate. This Assessment, however, looks at these sites individually to determine their deliverability so the 10% is not applied to these sites (see Appendix D). Either approach is considered valid.

10.5 Empty Homes Allowance

Burnley’s Local Plan 2012 – 2032 made an allowance for the reoccupation of empty homes for the period 2012-19. This allowance (228) was based on the specific performance and targets in the Council’s Empty Homes Strategy (as opposed to a general reduction in the level of empty homes). The figure for the re-occupation of vacant homes via Council direct action for 2012 -2019 used in this assessment is based on actual performance and is 282. This allowance was and is therefore a conservative estimate as the overall number of empty homes has significantly reduced over the Plan period to date. Further analysis of the number vacant homes within the Borough and the Council’s work to reduce the number can be found in the Council’s [Authority Monitoring Report](#).

11. 5-Year Housing Land Supply Assessment Calculation

5 Year Housing Land Supply Calculation Summary

Burnley's Local Plan sets a requirement of a minimum of 3,880 net additional dwellings over the plan period 2012-2032, equivalent to an indicative annual average of 194 net additional dwellings. The Council reviewed the Local Plan in 2023 and found that the Local Plan, including the housing requirement, did not require updating. A new NPPF and revised standard method for calculating local housing need was published in December 2024. The Council's position is that for the purpose of calculating 5 Year supply, the Council can rely on footnote 39 (as the Local Plan has been reviewed).

Housing Requirement:

Five years supply indicative target = 194×5	970
Surplus 2012/13 – 2023/24 (Requirement – (Completions + Empty homes re-occupied)) $(2522 - (2753 + 282)) =$ (Housing Trajectory Supply Category 1 and 2)	513
5% Buffer = $(970 - 513 \times 5\%)$	23
Amended Five Year Supply Target = $(970 - 513 + 23)$	480

Against this requirement, the Council currently has a supply of:

Sites under construction as at 31 March 2025 (delivery expected in the next 5 years) (Shown in Appendix E)

(Housing Trajectory Supply Category 3)

Unallocated Sites Under Construction =	60
Allocated Sites Under Construction (listed below) =	392
HS1/4 Land at Rossendale Road (whole site - 2 developers)	
HS1/9 Higher Saxifield	
HS1/12 Former Heckenhurst Reservoir	
HS1/30 Land West of Smithyfield Avenue	
HS1/29 Former Lodge Mill, Barden Lane	
HS1/32 Butchers Farm	

Sites not yet started as at 31 March 2025 (delivery expected in the next 5 years) (Shown in Appendix D)

(Housing Trajectory Supply Category 4a and 4b)

Not major sites and sites with detailed planning permissions = (including the following allocations: HS1/22 Former Dexter Paints HS1/2 Hollins Cross Farm)	403
Major sites with outline permission = (including allocations)	0
Local Plan Allocations without Planning Permission as at 31 March 2025* = (Housing Trajectory Supply Category 5)	250
Windfall Allowance (3x26) = (Housing Trajectory Supply Category 6)	78

Total Supply = 1183

* The Local Plan Housing Trajectory anticipated delivery dates for the allocations then without planning permission that would form part of the Council's 5-year supply. This has been updated in Appendix E.

12. Conclusion on Burnley's Housing Land Supply Position

The Council considers that it can demonstrate in excess of 12 years housing land supply.

The current 5-year supply target = 480

This is equivalent to 96 per annum (480 divided by 5 = 96)

Given the 5-year supply of 1183 this is equivalent to 12.3 years (1183 divided by 96 = 12.3)

Housing Land Supply Assessment 2024: Appendix A - Completions 2024/25

Completion ID	Site ID	PP Ref	Site Name	Dwellings Completed	Type e.g. new build	Green/Brownfield	PDL No	GF No	Site Type	Site size category
